Relevant Skills

Experienced in general game related programming primarily in Unity, with additional experience with other engines (Unreal). Strong knowledge in Sound Design including asset creation, mixing, mastering, and audio implementation in middle software such as Wwise. Furthermore, have skills in web and software development.

Technical Skills

- DAWS: Reaper, Pro Tools
- Version Control: GitHub
- Audio Implementation: Wwise, Unity API
- Unity Engine
- Languages: C#, Java, Python, JavaScript
- Debugging & Troubleshooting

Soft Skills

- Teamwork
- Time Management
- Adaptability

Game & Programming Experience

Intern, Build A Rocket Boy, Edinburgh (June – August 2024)

- Play tested EVERYWHERE's open beta with a focus on creator tools and interactive systems, including audio-related workflows.
- Identified, documented, and reproduced bugs using annotated recordings and screenshots, providing feedback and improvement suggestions.

Student Demonstrator, Edinburgh Napier University, Edinburgh (September 2023 – May 2024)

- Assisted lecturers during practical sessions, supporting students with Wwise integration and audio implementation in Unity.
- Guided students with asset creation, Wwise events, soundbanks, and Unity C# scripting for interactive audio systems.
- Debugged Wwise-Unity issues for 20+ students.
- Assisted students with audio production and implementation using Reaper, Pro Tools, Unity, and Wwise.

Volunteer, Games Talks Live, Edinburgh (May & November 2024, April 2025)

- Assisted with guest check-in, managed name cards, resolved minor issues during events, and supported the dismantling and packing of equipment.

Honours Project, Edinburgh Napier University, Edinburgh (September 2024 – May 2025)

- Developed a mod for the Unity game Lethal Company using the BepInEx plugin for .NET based games.
- Created a WPF application to track player data and provide runtime commands to adjust mod settings.
- Implemented interactive systems connecting the console and mod, enabling real-time control of in-game features.

Work Experience

Venue Technician, Gilded Balloon, Edinburgh (July – August 2025)

- Operated live light and sound systems for shows, managing signal flow, cue execution, and fast changeovers under time pressure.
- Assisted venue build/get-in/get-out; followed H&S and emergency procedures.

Housekeeper, Clan MacDuff Hotel, Fort William

(July – August 2022, June – August 2023, June – September 2024)

- Cleaned, organized, and maintained guest rooms to a high standard, ensuring all areas were tidy, well-stocked, and comfortable for guests.
- Assisted as a Kitchen Porter during breakfast service, supporting the team with tasks, managing kitchen duties efficiently, and developing strong teamwork and time management skills under pressure.

Education

BSc (Hons) Sound Design, Edinburgh Napier University [First Class Honours] (September 2021 – May 2025)

- Developed proficiency in asset creation, mixing and mastering, C# programming in Unity, Wwise integration, and video editing for interactive media and game projects through university coursework and projects.

MSc Computing, Edinburgh Napier University (September 2025 – Present)

- Course includes Software Development, Databases, Web Development, and Computer Systems
